Comments: I understand that your comment period for the proposed Yucca Mountain repository ends February 9, 2000. My comments on this proposal follow:

- 1 I am opposed to the proposed repository at Yucca Mountain for this nation's spent fuel and high-level waste from commercial and nuclear weapons facilities. Shipping highly radioactive materials through 43 states and within half-a-mile of 50 million Americans--by schools, hospitals, farms and homes--is an unconscionable risk to the health and safety of our people. In fact, according to the draft environmental impact statement, human health will be harmed more by shipping the waste than by keeping it on site.
